Programs

- Water Softeners
- Water Filters
- Deionizers
- Reverse Osmosis System Services
- Domestic Water
- Cooling Water
- Boiler Water
- Automation
- Web Based Monitoring/Controls
- Waste Treatment
- Chemical Feed System
- Warranty/Repairs
- Emergency Service 24/7
- Service Agreements
Eliminate Costly Downtime

Increase the life expectancy of your reverse osmosis elements through regular preventive maintenance of your system.

As one of our customers you benefit from over 100 years of cumulative experience in water treatment industry. Receive complete customer satisfaction based on mutual respect, trust and honesty.

For a detailed analysis of your system and of your problems, contact your Aqua Science representative today for cost-effective solutions.
CHEMICAL DOSING/MONITORING

Increase System Efficiency

Aqua Science utilizes the latest in water management technology. We provide a wide range of automated controls for cooling and boiler water systems. Automation allows for tighter control and a more efficient system operation which includes good heat transfer, energy savings, reduced operator load and reporting.

We have a web based data logging and communications tool called Aqua-Reports. This tool provides real-time availability of operator logs and service reports, quick access to MSDS’s and PDS, e-mail alarm notifications, secure data storage and data graphing capabilities.

WASTEWATER TREATMENT

- 502 Regulation Compliance
- Waste, Sludge, and Metals Reduction
- Liquid/Solid Separation
- Influent/Effluent Studies
- Interactive Monitoring Systems
- Polymer Feed Equipment
- Hazardous Waste Removal
- Belt Press Cleaners
- Jar Testing and Evaluation

The Aqua Science Wastewater Treatment Program encompasses all facets of sludge and wastewater management. We provide innovative and practical solutions to the day-to-day concerns of wastewater treatment. Your Aqua Science representative can work with you closely to find the best solutions for your facility.

Value

Working independently or with your state consultant, our products and services can add value to your operation.

- Account Management
  - Commitment to Cleanliness
  - Contract Purchasing
  - E-Report Online Monitoring and Reporting System
  - 24/7 Emergency Service Network
  - Operator Training
  - Periodic Performance Review
  - Computerized Reports

- On-Site Analysis
  - Boilers, Cooling Towers, Closed Systems (Chilled/Hot), Condensate, Softeners, Deaerators, RO, check operation of water treatment equipment, monitor water quality, check inventory

- On-Site Response
  - Recommendations
  - Adjustments
  - Repairs

- Consulting
  - Utility impact Analysis
  - Pretreatment Equipment Design/Build
  - Equipment Inspection
  - Water and Energy Savings

- Personnel Safety/Supply Chain Management
  - Bulk Delivered Chemicals
  - Hands-Free Chemical Feed Systems
  - Inventory Control

- Chemical Products
  - State Formula Blending
  - Aqua Science, Inc. Proprietary Formulas
  - Commodity Chemicals
  - Test Reagents
Cut Costs with Smart Treatment

Is the water you use day to day helping or hindering your operation? Chances are it could be more efficient than it is. Companies that use poorly treated water for industrial processes often wonder why equipment breakdown occurs later on. It is only then that they realize the need for a proper water treatment program.

Make the smart choice before problems occur. Contact one of our water treatment experts about the best strategy for you. We can help you increase efficiency, save resources, and improve your bottom line.
